

CAFÉ DES SCIENCES INVITATION

THURSDAY
MARCH
6th at 7 pm

Alliance Française de Los Angeles,
the S & T Office of the Consulate of France
and the Consulate General of Belgium

PRESENT

LIFE IN THE UNIVERSE

BY Jean-Luc Margot, PhD

Jean-Luc Margot is a Belgian-born astronomer and a UCLA professor who specializes in planetary sciences. His graphics-rich presentation will address questions related to the origin and distribution of life in the Universe, a discipline known as astrobiology. What makes this universe habitable? Are there other habitable worlds or intelligent life elsewhere? Can we establish contact with another civilization? Professor Margot conducts research on the properties of habitable worlds using a variety of telescopes, including the largest telescope on Earth at the Arecibo Observatory in Puerto Rico.

VENUE

Alliance Française
Suite 120 (Ground floor)
