VERNON ROSARIO, UNIVERSITY OF CALIFORNIA, LOS ANGELES
ERIC VILAIN, UNIVERSITY OF CALIFORNIA, LOS ANGELES

MODERATED BY

ANNE LE GOFF, UCLA/EPIDAPPO
+ VANESSA NURCK, UNIVERSITE PARIS 8/EPIDAPPO

A revolution prompted by intersex people and their allies has started to occur in the medical management of intersex. It has brought to light and sought to overcome the ethical violations accompanying the traditional standard of care. Yet, scientific and social obstacles remain. Intersex bodies disturb our profoundly binary social categories of sex and gender and call for a tremendous shift in our ways of representing ourselves. How can we bring the best medical and social care to intersex individuals, with intersex individuals? This symposium brings together life and social scientists, philosophers, physicians, and advocates.

A symposium organized by epigenetics, data and politics (EPIDAPPO, CNRS) & the GDR “FORMS OF LIFE” and co-sponsored by the UCLA INSTITUTE FOR SOCIETY AND GENETICS & THE OFFICE FOR SCIENCE AND TECHNOLOGY OF THE EMBASSY OF FRANCE IN THE UNITED STATES.

This is a free and public event.
