Café des sciences #37 with Dr. Liliane Parise

Published on Friday March 11, 2011
View online : https://www.france-science.org/Cafe-des-sciences-37-with-Dr.html

Date : 15 Mars 2011 : 18h-20h
Location : Cambridge Innovation Center - Havana Room - 5th Floor - 1 Broadway - Kendall Square – Cambridge Presentations in French

Topic of the meeting

Scientific literature shows that an early handling of problematic relations between parents and babies allows, in the majority of cases, for the child to be better integrated into the family. For these babies and children, there are special centers, including the University Hospital Center of Tivoli at La Louvière in Belgium. The facilities there give parents the change to live daily life with their babies and experience care-giving, meals, moments of difficulty, enjoyment, or pain in a secure and therapeutic location.

Dr. Parise will discuss her work and show how early handling of problems in parent-child attachment is not only a therapeutic endeavor but also a means of prevention.

Dr. Liliane Parise is the Head Clinician in the Pediatrics Department and is in charge of the joint parent-baby hospitalization in the University Hospital Center of Tivoli at La Louvière in Belgium.
