The Office of Science and Technology (Los Angeles Section) is endorsing The Mediterranean City 2012, a conference addressing climate change adaptation in Mediterranean urban areas that is being held in Los Angeles from June 25-27.

The Mediterranean City: A Conference on Climate Change Adaptation will initiate an ongoing collaboration of cities working together to adapt to the current and future impacts of climate change. It will bring together experts from a variety of different fields including business, policy and public health to serve as an example that cities across regional and national boundaries can work together to bring more resources and knowledge to building solutions.

The conference will address the integrated issues common to Mediterranean cities with workgroups focused on the following interrelated topics:
- Water: Resilient Water Management Strategies for a Changing Climate
- Energy: Transitioning to an Energy Efficient and Low Carbon Future
- Biodiversity and Open Space: Building an Ecological City
- The Built Environment: Designing Healthier Communities
- Public Health: Preparing People for Their Future
- Governance: Rethinking Boundaries
