Inserm is recruiting 40 tenured research director until February 28, 2013

Inserm (National Institute for Health and Medical Research) is the only French public research institute to focus entirely on human health. Its researchers are committed to studying all diseases, whether common or rare. Through its diversity of approaches, Inserm provides a unique environment for researchers. 13 500 researchers, engineers and technicians work in the 300 Inserm laboratories housed in hospitals, universities and research campuses, all over France.

Candidates to Research Associates and Research Directors positions must have a PhD (or equivalent degree). There is no nationality restriction.
