IRSTE A – National Research Institute of Science and Technology for Environment and Agriculture, is a public scientific and technological research establishment (EPST) under the joint supervision of the French Ministry of Research and the Ministry of Agriculture. A well renowned research institute in the field of inland waters, ecotechnology and territories, IRSTE A has set itself three major scientific challenges driven by significant societal issues: environmental quality and the challenge of linking methods and technologies; the issue of water in spatial development and the challenge of multi-sector approaches; risk management and the challenge of viability.

IRSTE A opens its 2013 call for PhD positions

Applicants must have a Masters degree or equivalent qualification when the contract is signed. Applicants are invited to first log on the website to learn about the main subjects that will be funded by IRSTE A in 2013.

- Submit an application (opened on March 25, 2013): http://pcas.irstea.fr/

Registration portal is open from March 25, 2013 to May 20, 2013
