Building up to the United Nations Climate Change Conference to be hosted by France in December 2015 (COP 21-Paris Climate 2015), the Embassies of France in both Canada and the United States are organizing FACTS (French Ameri-Can Climate Talks), a conference series to take place in seven cities in the United States and Canada involving renowned scientists, civil society representatives, NGOs, political figures, journalists and entrepreneurs.

FACTS in New Orleans

How can we best prepare for climate change consequences?

In partnership with the Tulane University, the Embassy of France in the United States and the Consulate General of France in New Orleans will organize a conference to discuss the impacts of climate change and how we can prepare to face them. Gathering high-level experts from different fields, this conference will be an opportunity to present the latest scientific assessments of the impacts of climate change, the measures and strategies local and national governments are taking to get prepared and become more resilient, as well as the issues at stake in the negotiations that will be key to achieve an agreement in Paris in 2015.
