Meet the French Office for Science Technology at the MIT European Career Fair – February 6, 2016

The European Career Fair @ MIT is an annual recruiting event that connects employers from Europe with the most talented candidates who live in the US.

The European Career Fair has been organized by MIT’s European Club with support from the European Commission and the MIT International Science and Technology Initiatives every year since 2007. This year, the European Career Fair will be held on February 6, 2016, on the MIT camus in Cambridge, MA.

A dedicated Science & Technology space will promote Europe as a great place to pursue a career in S&T, whether it be in industrial research, within research organizations, academia or science policy. The best of what Europe has to offer will be presented, in all its diversity: public, private, national and international. EU Member States will be represented by their national research organizations and companies involved in research.

On the “Science & Innovation in France” booth, you will find information about the French Research & Innovation system and research opportunities in organizations like the CNRS, Inserm, CNES and CEA.
