Clinatec seeks €30 million to combat neurodegenerative diseases, cancer and ailments that cause handicaps

The biomedical research center, Clinatec, recently launched an international campaign to collect €30 million within the next five years. Clinatec, which was created through the collaborative efforts of CEA, the CHU of Grenoble and Inserm, is a neuro-clinic that specializes in therapeutic medical innovations that combine micro-nanotechnologies and electronics. Clinatec plans to invest the money that it will collect in projects aimed towards finding solutions to neurodegenerative diseases, cancer and ailments that cause motor disabilities.
