The President of CNES, Jean-Yves Le Gall, was present at the Satellite 2019 conference on the 7th of May which took place, as every year, in Washington D.C. and took part in a space leaders forum on '*Navigating the Fractured Geopolitical Landscape*', taking the opportunity to underline the excellent performance of France's space industry. Shortly before the panel, the President went to the Pavillon France and met with representatives of the New Space Factory and GIFAS, the French aerospace industries association to discuss French-American cooperation perspectives.

At this occasion, the Maison Française of the Embassy of France hosted on the evening of the 6th of May the "*French Aerospace Industry Night*", a networking event organized by GIFAS which brought together representatives of French and American aerospace companies.

The presentation of the French aerospace companies of the Pavillon France is available in PDF download below.
