- **When:** Wednesday, June 24, 2015, 2:30 pm to 8:00 pm
- **Where:** Marriott SpringHill Suites Denver Downtown at MSU Denver, (1190 Auraria Parkway, Denver, CO 80204)
- **Free event:** Register on <http://facts-denver-2015.eventbrite.com/>

Building up to the **United Nations Climate Change Conference** to be hosted by France in December 2015 (**COP 21 - Paris Climate 2015**), the **French Ameri-Can Climate Talks (FACTS)** conference series is back for a second edition with **12 events across Canada and the United States** involving renowned scientists, civil society representatives, NGOs, political figures, journalists and entrepreneurs. In preparation for the United Nations Conference, it seems important to consider the challenge of climate change not only in the context of a shared emissions burden but also as an opportunity to create employment, economic growth and innovative modes of production and consumption.

### FACTS in Denver

#### Climate Change: Effects on Health and the Quality of Life Perspectives from France and Colorado

On June 24, 2015, the French Ameri-Can Climate Talks (FACTS) will be traveling to Denver to hold a conference highlighting **climate change's effects on health and the quality of life from the perspectives of France and Colorado**. Held at Metropolitan State University (MSU) of Denver, the conference will welcome a variety of speakers and panelists to discuss the issue in detail, with a special emphasis on **water** as well as **new emerging diseases**. Local and French scientists and professionals will come together in Denver to explore these effects of climate change, with the goal of bringing public opinion to light.

FACTS Denver is organized by the Office for Science and Technology at the Consulate general of France in Los Angeles, the Alliance Française de Denver and One World One Water (OWOW) Center at Metropolitan State University of Denver.
