

## CNES MAG n°68: Cooperation, A Global Ambition

Published on Friday June 17, 2016

View online : <https://www.france-science.org/CNES-MAG-no68-Cooperation-A-Global.html>

This issue of the quarterly magazine from the French Space Agency, without claiming to be exhaustive, focuses on international CNES cooperation, from the 50th anniversary of the French-Russian partnership in space, to joint development of the Merlin satellite with Germany (dedicated to the methane monitoring) through the reinforcement of the oceanography sector with the United States. A dozen of new international agreements were signed by CNES in 2015, as another proof of the global reach of France and of its space industry worldwide.

We invite you to extend this overview of the potential of CNES regarding science and technology, the roots of its international relations, by participating to the **2016 Toulouse Space Show from June 28 to June 30, 2016**. For more information, visit <http://www.toulousspaceshow.eu/tss16/>.
