Clocks are ubiquitous in the history of the human race. They have been indispensable in many disparate applications, from coordinating events, to navigation, to making ultra-precise scientific measurements. But what is a clock in general, and in particular what are the most accurate clocks, called atomic clocks?

To answer your questions, the [Alliance Française de Pasadena](#) and the [Office for Science and Technology of the Consulate of France in Los Angeles](#) are pleased to invite to a Café des Sciences on **November, Friday 18, 2016** from **7:00PM** where Eric Burt, senior researcher at the Jet Propulsion Laboratory will present:

Atomic Clocks

- **When:** Friday 18 november 2016 at 7.00PM
- **Where:** Alliance Française de Pasadena
- Presentation in **French**
- Free event for members, 10\$ for non-members; please [RSVP by mail](#)
