ACS/SCF Franco-American Lectureship Prize

About the Award :

In 2016, **American Chemical Society** (ACS) and the **French Chemical Society** (SCF) signed a three-year alliance agreement. As part of the agreement, the Franco-American Lectureship Prize was established. In alternating years, ACS and SCF will take turns hosting a chemist for a lecturing tour.

Strong candidates for this prize will :

- Have strong connections with the Franco-American research community.
- Be a researcher or chemist in France.
- Contribute to professional interactions between the Franco-American chemical enterprise.
- Be a member of the French Chemical Society (SCF)

Nominees with a strong scientific background at the early and mid-career levels are welcomed. Applications will be selected by a sub-committee of the Committee on International Activities.

To nominate a prospective French chemist to tour the United States, **submit a nomination**. To nominate an individual for this prize, please have the following prepared :

- A biographical sketch/shortened CV for the nominee
- Known affiliations/organizations the nominee belongs to
- Citation
- Letter of recommendation
- Optional second letter of recommendation
- List of nominees most significant publications/patents
- Recommendations for which ACS Local Sections/Division that nominee might be paired with to deliver his/her talk

You can learn more about the requested **information here**.

Nominations for the 2017 prize are due August 18. Awardees will present their talk prior to the 2018 ACS National Meeting.

Learn more about the **SCF Bi-national prizes**.
