**Kei Koizumi**, AAAS (American Association for the Advancement of Science) senior fellow, addressed the Science Diplomats Club on Thursday, April 19, 2018 from 8am to 10am, at the Embassy of France in Washington, DC.

### About the Presentation

Kei spoke about the recent Novim report **“Warning Signs : Effects of Proposed Federal Funding Cuts to Environmental and Climate Research and Development Programs”** that he co-authored. The report analyzes the U.S. 2018 budget’s potential impacts on climate and environment R&D investments. Koizumi updated the report in light of the recently-completed 2018 U.S. federal appropriations and the recently-released 2019 budget, and discussed the broader implications of final 2018 funding levels for the U.S. science and engineering enterprise and international S&T cooperation.

### About the Speaker

Kei Koizumi is a senior advisor in Science Policy at the American Association for the Advancement of Science (AAAS). He joined AAAS in February 2017 after 8 years as Assistant Director for Federal Research and Development and senior advisor for the National Science and Technology Council at the **White House Office of Science and Technology Policy** (OSTP). There, he was responsible for leading OSTP engagement on the U.S. Federal R&D budgets, appropriations, and policies and for S&T policy coordination through the National Science and Technology Council.

### About AAAS

AAAS is the world’s largest multidisciplinary scientific society and a leading publisher of cutting-edge research through its Science family of journals. It was created in 1848 and has now individual members in more than 91 countries around the globe. Membership is open to anyone who shares their goals and belief that science, technology, engineering, and mathematics can help solve many of the challenges the world faces today.

### About the OSTP

Congress established the Office of Science and Technology Policy in 1976 with a broad mandate to advise the President and others within the Executive Office of the President on the effects of science and technology on domestic and international affairs.

The mission of the Office of Science and Technology Policy is threefold ; first, to provide the President and his senior staff with accurate, relevant, and timely scientific and technical advice on all matters of consequence ; second, to ensure that the policies of the Executive Branch are informed by sound science ; and third, to ensure that the scientific and technical work of the Executive Branch is properly coordinated so as to provide the greatest benefit to society.
