The Office for Science and Technology is glad to invite you to the workshop on International education needs and opportunities in smart manufacturing for the industry of the future. Organized jointly by Texas A&M Engineering Experiment Station (TEES) and the French Ecole Nationale Supérieure des Arts et Métiers (ENSAM), this workshop will take place in Texas A&M on June, 22nd and 23rd right after the MSEC conference.

The workshop will follow the 2018 edition of the International Manufacturing Science and Engineering Conference hosted by Texas A&M.

Organized by two world-class engineering institutions, this workshop will discuss key technologies such as fiber composites, 3D sensors for smart manufacturing or the helicopter factories of the future, with prestigious guests from Airbus, NSF and the DOE. Furthermore, presenting the [new cooperation programs and joint research projects between ENSAM and TEES](#). This event is quickly becoming a must for the smart manufacturing community.

Come and join us on June 22nd at 5 PM in Texas A&M Engineering Station's Hall of Champions for a reception followed by the ENSAM - Texas A&M workshop starting at 8:30 am on the 23rd. And meet the Consul General of France in Houston, Alexis Andres, in a reception open to all guests at 4:30 pm the same day!
